

Lotus Notes / Web Developer

Salary: £35,000 to £40,000 depending on experience.

Reporting to: Head of Operations

Aim: Delivering technical solutions to customers, which involves project based development and customisation of the customer's key applications: these are a mixture of Notes client and web-based Domino applications. Providing back up to Service Desk team as required for application support.

Responsibilities:

1. Deliver technical solutions to customers around our core technologies as needed.
2. Create build specifications, documentation and testing of design solutions and code.
3. Attend customer meetings as needed, both in support of sales activity and during projects.
4. Provide Sales Support to the sales team as needed, both around consultancy needs and Development opportunities.
5. Attend regular Operations meetings bringing information as directed by Head of Operations

Required knowledge and experience

- Strong working knowledge of Domino web application design using Javascript, HTML, CSS, web services, XML and experience with Java would be beneficial.
- Ideally CLP or PCLP qualified with at least 2 years Notes / Domino development experience using @formula and LotusScript.
- Understanding of the full application development lifecycle, the ability to produce build specifications, high quality code, documentation and support testing procedures.
- Professional attitude.
- Excellent communication skills.
- Ability to work flexibly.
- Ability to use own initiative and have a "self starter" attitude.
- Team working skills.
